INLIGHT THERAPY

A REVOLUTION IN LIGHT THERAPY

When [InLight Therapy](#) was founded in 1985, the company was already light years ahead in the technological advancement and development with its alternative, non-invasive, non-abrasive modality that supports the body's natural healing process by increasing circulation to reduce inflammation and pain.

The original basis for the creation of InLight Therapy was derived from the acupuncture concept of pressure points. The InLight technologists researched and experimented with the process of applying non-invasive LED lights to certain pressure points of the body. When applied, it was discovered that the lights would activate and aid in stimulating the body's natural self-healing abilities. The outstanding results proved to increase circulation, decrease pain and overall well being.

Today, InLight is leading the industry with their wide range of therapy devices that are FDA cleared to increase circulation and decrease pain. The company's systems are safe, drug-free and non-invasive with no known side effects. The main focus of the research team is to ensure that the systems provided are always leading edge and the highest quality LED systems in the market place.

InLight Therapy's mission is to deliver the most innovative and technologically advanced polychromatic LED systems for an alternative, non-invasive remedy to decrease pain and enhance wellness to people around the world.

CONTROLLERS

INLIGHT MEDICAL CONTROLLERS ARE ENGINEERED WITH PROGRESSIVE MULTI-PULSE™ TECHNOLOGY. THEY DELIVER BLUE, RED, AND INFRARED WAVELENGTHS (PHOTONS) TO THE SKIN.

The controllers are highly user friendly and built with pre-programmed automatic settings containing the Progressive Multi-Pulse technology and a 20-minute shut-off timer. The input jacks fit all InLight Medical therapy pads, and all pads and controllers can be used interchangeably.

6/PORT PRO CONTROLLER

SKU: 6P-C

The Inlight Therapy state-of-the-art 6/PORT PRO Controller is engineered with the Inlight Progressive Multi-Pulse™ technology for professional and home use.

Inlight Therapy controllers house the unique technology that delivers blue, red, and near-infrared (NIR) wavelengths (photons) with Progressive Multi-Pulse™ technology. The controllers are highly user-friendly and built with pre-programmed automatic settings and a 20-minute shut-off timer.

Product Features

- 6/PORT PRO controller with Progressive Multi-Pulse™ technology
- 6 output ports powering up 6 interchangeable Inlight polychromatic therapy pads
- 3 easy-to-use automatic settings pre-programmed with Progressive Multi-Pulse™ technology
- 7 manual setting options
- 20-minute automatic session timer
- Durable metal casing
- Illuminated LED display
- Surface-mounted IR detector
- Push-button mute option
- Inlight Therapy System Power Supply. Good for any power anywhere in the world. Input 100-240V - 50-60Hz, 1.2A max. Output 12.0V, 5.0A.
- 6 foot AC power cord with 3-prong plug, NEMA 5-15P Connector, with C13 Connector that plugs into Power Supply.

Price: \$2,495.00
